Upskill your current modalities and add hypnotherapy to your healing toolkit.

If you already run a clinic or practice helping people improve, grow and transform hypnotherapy is a wonderful and complimentary modality to offer.

Hypnotherapy compliments many other treatments and I've trained a large number of therapists on how they can incorporate clinical hypnotherapy in to their already established practice.

The 'Academy Of Therapeutic Hypnosis' offers the most comprehensive training in the country. Our training is designed to give you the skills, knowledge and practical application to start working as a hypnotherapist as soon as you graduate.

We give you the training and tools to get started and guarantee 12-month mentoring following graduation to ensure you have the support and guidance you need to build a successful practice.

You'll learn specialised areas of hypnotherapy, which can be offered as standalone treatments to expand your practice, as well as general hypnotherapy, which can be incorporated in to other healing sessions for your current clientele.

The specialised areas you'll learn are:

- ◆ Quit smoking
- ◆ Desired weight & virtual gastric band surgery
- ◆ Management of anxiety & panic attacks

These areas alone can build and sustain a busy practice!

Our upcoming program runs over four-days of intensive training on:

- ◆ FRIDAY 25 FEBRUARY to MONDAY 28 FEBRUARY 2022

Call me to learn more about the AOTH training course and get a copy of our prospectus. To learn more book in a call with me here:
